- Master's & undergraduate students in civil, chemical, agricultural & environmental engineering.
- Biosolids brainiacs from any major.

Showcase your innovative ideas to industry leaders, gain recognition, and stand out in your future job application!

 NOVEMBER, 13-14
2024

USAID BUILDING WATER INFRASTRUCTURE
CONFERENCE & EXHIBITION ON BIOSOLIDS
MANAGEMENT FOR GREEN FUTURE.

WINNERS WILL BE
AWARDED WITH PRIZES!

TERMS AND CONDITIONS APPLY

illuminating Ideas: From Concept to Canvas

Challenge:

The sludge from wastewater treatment plants is either stockpiled or disposed of in landfills which directly impact the environment. In addition, the existing handling and disposal of sludge creates a financial burden for Jordan and potential harm to public health. Converting sludge into biosolids offers dual benefits, creating a valuable resource while addressing a critical national challenge.

Steps to Participate:

Step 1

Register through our form & include your innovative concept abstract.

1

BY: SEPTEMBER 14, 2024

Step 2

Selected candidates will be notified to start developing their full posters according to the provided guidelines.

2

BY: SEPTEMBER 29, 2024
